WARNING: GENUINE WEBER-STEPHEN REPLACEMENT PARTS MUST BE USED FOR ANY REPAIR OR REPLACEMENT. YOUR ACTIONS, IF YOU FAIL TO FOLLOW THIS PRODUCT WARNING, MAY CAUSE A FIRE, AN EXPLOSION, OR STRUCTURAL FAILURE RESULTING IN SERIOUS PERSONAL INJURY OR DEATH AS WELL AS DAMAGE TO PROPERTY. (WILL VOID ALL WARRANTY PROTECTION.)

DANGER: BEFORE PERFORMING ANY WORK MAKE SURE THE GAS SUPPLY IS TURNED OFF AT THE SOURCE. FAILURE TO FOLLOW DANGERS, WARNINGS AND CAUTIONS CONTAINED IN THIS INSTRUCTION SHEET MAY CAUSE A FIRE OR AN EXPLOSION RESULTING IN SERIOUS PERSONAL INJURY OR DEATH AS WELL AS DAMAGE TO PROPERTY.

BEFORE STARTING: Make sure lid is closed and casters are locked to prevent grill from moving.

NOTE: Grills illustrated may have slight differences than model purchased.
NORTH AMERICAN GRILLS

LP UNITS:
A) Make sure gas supply is turned off at source.
B) Disconnect LP cylinder from inside of cabinet base.
C) Remove LP cylinder from cabinet base.

⚠️ WARNING: Do not use a wrench to loosen the connection. Using a wrench could damage the regulator coupling and could cause a leak.

NG UNITS:
A) Make sure gas supply is turned off at source.
B) Slide collar of quick-disconnect back to remove flexible gas supply hose from gas source.

EXPORT GRILLS

LP UNITS:
⚠️ WARNING: Make sure that the LPG cylinder or regulator valve is closed.
A) Remove the gas supply cylinder by shutting off the gas supply and disconnecting the hose and regulator assembly from the cylinder.
   Identify your regulator type. Follow the disconnection instructions for that regulator.

   Disconnect by Turning Anti-Clockwise
   Unscrew regulator from cylinder by turning fitting anti-clockwise (1).

   Disconnect by Turning Clockwise
   Unscrew regulator from cylinder by turning fitting clockwise (2) (3).

   Disconnect by Turning Lever
   Turn regulator lever to the down/off position (4). Push in on regulator lever (5) until it releases from the cylinder (6).

   Disconnect by Sliding Collar
   Make sure regulator lever is in the off position (7) (9). Slide the collar of the regulator up (8) (10) to disconnect from the cylinder.

B) Remove LPG cylinder.

NG UNITS:
A) Make sure gas supply is turned off at source.

   Manual Shut-Off Valve
   B) Disconnect flexible gas supply hose from manual shut-off valve (11). Refer to instructions included with your flexible gas supply hose.

   — OR —

   Gas Outlet Valve
   B) Disconnect flexible gas supply hose from gas outlet valve (12). Pull plug out to disengage hose from cover plate. (This automatically shuts off gas.) Refer to instructions included with your flexible gas supply hose.

See Owner's Guide for complete gas connection and removal instructions.
2 LID ASSEMBLY AND COOKBOX COMPONENTS REMOVAL

3 CONTROL PANEL REMOVAL

TOOLS NEEDED: - PHILLIPS

4 MANIFOLD REMOVAL

TOOLS NEEDED: - PHILLIPS
- 7/16", 9/16", 3/4"
REMOVAL NOTE: If igniter electrode assembly does not easily slide out from mounting bracket, use a small pair of pliers or channel locks to grasp metal igniter bracket of igniter electrode assembly.
**IGNITER ELECTRODE REINSTALLATION**

VISUAL CHECK: SEE IF IGNITER BRACKET STOP ON IGNITER ELECTRODE IS FLUSH WITH BURNER TUBE MOUNTING BRACKET.

**REPLACEMENT PART INSTALLATION**
MANIFOLD INSTALLATION

TOOLS NEEDED:
- PHILLIPS
- 7/16", 9/16", 3/4"

CAUTION: Burner tube openings (2) must be positioned properly over valve openings (3).
**WARNING:** Make sure all control knobs are turned to the OFF position before reconnecting gas supply and operating grill. Your actions, if you fail to follow this Product Warning, may cause a fire, an explosion, or structural failure resulting in serious personal injury or death as well as damage to property.

**CONNECTION OF HOSE TO GAS SOURCE**

**NORTH AMERICAN GRILLS**

**LP UNITS:**
A) Reinstall LP cylinder into cabinet base.
B) Screw regulator coupling onto cylinder valve; turn clockwise, or to the right.

**NG UNITS:**
A) Slide collar of quick-disconnect back and reconnect flexible gas supply hose.

**EXPORT GRILLS**

**LPG UNITS:**
**WARNING:** Make sure that the LPG cylinder or regulator valve is closed.
A) Connect regulator to LPG cylinder.
   - Some regulators push ON to connect and pull OFF to disconnect; others have a nut with a left-hand thread that connects to the cylinder valve.
   - Identify your regulator type and follow one of the connection instructions specific to that regulator.

   **Connect by Turning Clockwise**
   Screw regulator onto cylinder by turning fitting clockwise (1). Position the regulator so that the vent hole (2) faces down.

   **Connect by Turning Anti-Clockwise**
   Screw regulator onto cylinder by turning fitting anti-clockwise (3) (4).

   **Connect by Pushing Lever/Snapping into Position**
   Turn regulator lever (5) to the down/off position. Push regulator down on cylinder valve until regulator snaps into position (6).

   **Connect by Sliding Collar**
   Make sure regulator lever is in the off position (7) (10). Slide the collar of the regulator up (8) (11). Push the regulator down onto the cylinder valve and maintain pressure. Slide collar down to close (9) (12). If regulator does not lock, repeat procedure.

**NG UNITS:**
A) Make sure gas supply is turned off at source.

   **Manual Shut-Off Valve**
   B) Connect flexible gas supply hose to manual shut-off valve (13). Refer to instructions included with your flexible gas supply hose.

   — OR —

   **Gas Outlet Valve**
   B) Connect flexible gas supply hose to gas outlet valve (14). Insert plug into circular receptacle on cover plate, slide plug upward, and push plug in to engage. Refer to instructions included with your flexible gas supply hose.

See Owner’s Guide for complete gas connection and removal instructions.
**WARNING:** Make sure all control knobs are turned to the OFF position before reconnecting gas supply and operating grill. Your actions, if you fail to follow this Product Warning, may cause a fire, an explosion, or structural failure resulting in serious personal injury or death as well as damage to property.

### CHECK FOR GAS LEAKS

**DANGER**
Do not use an open flame to check for gas leaks. Be sure there are no sparks or open flames in the area while you check for leaks. Sparks or open flames will result in a fire or explosion, which can cause serious bodily injury or death and damage to property.

You will need: a soap and water solution and a rag or brush to apply it.

A) Mix soap and water.
B) Turn gas supply on at source.
C) Check for leaks by wetting fittings with soap and water solution and watching for bubbles. If bubbles form, or if a bubble grows, there is a leak.

**NOTE:** When leak checking is complete, turn gas supply off at the source and rinse connections with water.

Check:
D) Hose-to-Bulkhead connection (1).
E) Main gas line-to-Bulkhead connection (2).
F) Main gas line-to-Manifold connection (3).
G) Side burner line-to-Manifold connection (4).
H) Side burner valve-to-Side burner line connection (5).

**DANGER:** If there is a leak at connection (1, 2, 3, 4 or 5), retighten the fitting with a wrench and recheck for leaks with soap and water solution. If a leak persists, turn OFF the gas. **DO NOT OPERATE THE BARBEQUE.** Failure to follow dangers, warnings and cautions contained in this Instruction sheet may cause a fire or an explosion resulting in serious personal injury or death as well as damage to property. Contact the Customer Service Representative in your area using the contact information on our website. Log onto www.weber.com.

E) Valves-to-manifold connections (6).
F) Regulator-to-cylinder connections (7) (10).
G) Regulator hose-to-regulator connections (8) (11).
H) Flexible gas supply hose to gas supply connection (9) (12).

**DANGER:** If there is a leak at connection (6, 7, 8, 9, 10, 11 or 12), turn off the gas. **DO NOT OPERATE THE BARBEQUE.** Failure to follow dangers, warnings and cautions contained in this Instruction sheet may cause a fire or an explosion resulting in serious personal injury or death as well as damage to property. Contact the Customer Service Representative in your area using the contact information on our website. Log onto www.weber.com.

When leak checks are complete, turn gas supply OFF at the source and rinse connections with water.

**IMPORTANT:** To do a proper leak check, the control panel must be removed. After checking for leaks, replace the control panel and control knobs.

**US Gas Sources:**
- LP
- NG

**Export Gas Sources:**
- LP
- NG
12 CONTROL PANEL REINSTALLATION

TOOLS NEEDED:
- PHILLIPS

13 CHECK IGNITOR WIRES

REASSEMBLY NOTE: After completely checking igniter wires, check for igniter spark. Push down on igniter button, listen for a clicking sound, and check for a spark at ceramic igniter. If you hear a click and see a spark, igniter module is working.

14 LID ASSEMBLY AND COOKBOX COMPONENTS REINSTALLATION
⚠️ WARNING: Make sure all parts are assembled and hardware is fully tightened before operating the grill. Your actions, if you fail to follow this product warning, may cause a fire, an explosion, or structural failure resulting in serious personal injury or death as well as damage to property.

⚠️ PROPOSITION 65 WARNING: HANDLING THE BRASS MATERIAL ON THIS PRODUCT EXPOSES YOU TO LEAD, A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM. (WASH HANDS AFTER HANDLING THIS PRODUCT.)
